Jira connector with API token and URL

User stories fetched

The image displays two screenshots of a web application running on localhost:5173. The top screenshot shows a 'Fetched Jira Stories' table with columns: KEY, SUMMARY, STATUS, LINK, and ACTION. The bottom screenshot shows a 'My Appointments' table with columns: KEY, SUMMARY, STATUS, LINK, and ACTION. Both tables include a 'Generate Tests' button for each row. A network inspector on the right shows a successful POST request to http://localhost:8090/api/jira/fetch-stories with a 200 OK status.
